

# POLYLOK

## RISERS

Never before has there been a product that combines all the best features of concrete and plastic into one superior riser. We make risers that hold their shape, are stackable, screw together, and are watertight and airtight. Our risers have a patented flange for casting into concrete.

Each riser has two knockouts for electrical connections and recessed handles in our heavy-duty cover for easy lifting. POLYLOK risers have the ability to be located with a metal detector, and the covers come complete with stainless steel screws and factory installed gasket.

***Our riser covers are designed to meet your needs:***

- Heavy duty structural rib reinforcement for extra strength
- Green opaque color for UV-ray protection
- Two flush handles for easy lifting
- Visible, molded warning placards
- Custom engraving Now Available
- Custom colors Now Available
- 12" Tall 24" Riser
- Gaskets in every Cover & Riser
- Frost Proof
- Watertight and Gastight
